

## **EPPP – European Public Policy Partnership**

The European Public Policy Partnership (EPPP), an advisory and analytical institute, was established as a non-governmental organization with offices in Bratislava and Brussels. Since its creation, EPPP has designed, developed and implemented activities and offered innovative solutions focused on Education, Research & Development, Entrepreneurship, Social Sciences. Based on professional principles, practical experience and our network of contacts both at home and abroad EPPP helps create and spread latest knowledge and best practices.

EPPP supports organizations from both private and public sectors in the formation and fulfilment of strategic goals and specific projects. It creates the space for dialog and discussion among experts, academics, lawmakers, entrepreneurs and professionals. Representatives from EPPP are active in expert and working groups (mainly in the public administration) and advocate for specific changes leading to achievement of defined goals.

EPPP puts much emphasis on business dynamics and development of economic competitiveness in line with international standards and with the direct impact on the whole society. While operating within the Central European area, EPPP has accumulated valuable experience and skills. What is more, it has transferred the best practices in management of social changes and public policy into less developed economies and regions, which, however, possess a high potential for development.
